WANG MINGTING

Blockchain Backend Engineer

+86 186 2108 6202 | wangmingting920@gmail.com | github.com/Tobeyw

PROFESSIONAL SUMMARY

BlockchainBlockchain / Web3 Backend Engineer with 4 years of experience in cross-chain infrastructure, blockchain indexing, and backend development. Hands-on experience across the Neo (N3 / Neo X) and Ethereum ecosystems, including cross-chain bridges, blockchain explorers, DAO governance, and decentralized naming systems.

TECHNICAL SKILLS

Blockchain: Neo (N3 / NeoX), Ethereum,Cross-chain bridges, The Graph
Backend: Golang, Java, Node.js
Infrastructure: RabbitMQ, Kubernetes, CoreDNS
Smart Contracts: Solidity, C# (Neo)
Databases: MySQL, PostgreSQL, MongoDB

PROFESSIONAL EXPERIENCE

Shanghai Liao Technology Co., Ltd Shanghai, China.
Software Development Engineer Apr. 2021 – Jul. 2025 (Full-time) | Aug. 2025 – Apr. 2026 (Part-time)

Blockchain Explorer Indexer (Core Team Member) Aug. 2024 – Apr. 2025

• Designed and implemented a blockchain explorer indexer covering block, transaction, contract-event, and account data parsing, indexing, and PostgreSQL storage to support explorer query services.
• Designed separate service instances for historical backfill and real-time synchronization; used Worker Pool, channel, and Semaphore to improve backfill throughput while isolating resources for real-time sync.
• Implemented block-hash validation and consensus-state handling for chain reorganizations (reorgs), retaining non-canonical block versions to keep indexed data consistent with the canonical chain.

Cross-Chain Bridge System (Core Team Member) Oct. 2023 – Jun .2025

• Developed a two-way asset bridge between Neo N3 and NeoX in Go, including cross-chain validator and relayer logic.
• Implemented multi-signature verification and RabbitMQ-based asynchronous processing, keeping cross-chain confirmation time below 20 seconds.
• Supported production operations with 1,000+ cross-chain transactions and 30,000+ GAS transferred.

NeoNS Decentralized Naming System (Core Team Member) Sep. 2022 – Mar. 2023

• Developed a decentralized DNS system on the Neo blockchain.
• Built a CoreDNS plugin in Go to resolve blockchain-based domain names.
• Deployed the DNS service with Kubernetes to improve scalability and reliability.

Smart Contract Development for TogethDAO (Core Team Member) Mar. 2022 – Jul. 2022

• Implemented DAO fundraising and token distribution logic with Ethereum and Solidity; integrated Celer cBridge for cross-chain asset transfers.
• Built a The Graph Subgraph to provide blockchain data query APIs for real-time frontend display.
• Project received the Best Access Control Project award at ETH Shanghai Hackathon.

Grants Smart Contract Development (Lead) Apr. 2021 – Sep. 2021

• Designed and implemented quadratic voting and quadratic funding mechanisms on Neo using C#, with an oracle-based Sybil-resistance mechanism.
• Served 2,000+ users and 3,000+ votes, with more than 100,000 USDT in funding.
• Integrated the NeoLine wallet with Node.js to connect the frontend and backend workflows.

Shanghai Yuanxin Satellite Technology Co., Ltd. Shanghai, China
Blockchain Application Engineer Jul. 2020 – Mar. 2021

• Conducted research on blockchain data privacy technologies, focusing on Decentralized Identifier (DID) systems and digital rights protection, advancing secure identity management.
• Developed a digital rights protection feature for a proprietary social app using FISCO BCOS, ensuring secure content ownership and distribution.
• Integrated Java with FISCO BCOS to create APIs for the app, enhancing connectivity between blockchain and mobile applications.

RESEARCH EXPERIENCE

Blockchain-Based Information Storage Model and Query Method for Agricultural Product Traceability System Oct. 2018 - Oct. 2019

• Proposed a hybrid “database + blockchain” storage architecture;
• comparative experiments achieved an 88.66% improvement in query efficiency.
• Published findings in Transactions of the Chinese Society of Agricultural Engineering (EI), with the paper selected for the 2023 "Leader 5000 - Top Academic Papers in Chinese Scientific Journals".

EDUCATION

Shanghai Ocean University (Double first-class Construction) Shanghai, China
Master’s Degree in Computer Science and Technology Sep. 2017 - Jul. 2020

Fuyang Normal University Anhui, China
Bachelor’s Degree in Electronic Information Science and Technology Sep. 2013 - Jul. 2017

ADDITIONAL INFORMATION

• **Softo l lware Copyrights**: 3 registered software copyrights in blockchain and data provenance.
• Certification: Junior Blockchain Infrastructure Engineer.
